EDUCATION

Queen's University Belfast - BEng Software Engineering **Sept 2022 - May 2026**

Relevant Coursework: Software Design Principles (1st), Cloud Computing (1st), Object-Oriented Programming (1st), Data Structures & Algorithms (2:1)
Dissertation Topic: The Design and Implementation of a Constraint-Based Academic Workload Scheduling System with User Preference Modelling.

WORK EXPERIENCES

EventMAP Solutions **August 2025 - Present**
Part-time Software Engineer | C#, .NET, Vue.js, SQL, EF Core, Playwright, Git

- **Retained** as a part-time engineer following the completion of placement and subsequently offered a graduate position.
- Designed a major new area within the application, leveraging software design principles to create a **maintainable and scalable implementation** using **C# and Vue.js.**
- Delivered **7 hotfixes** across two enterprise SaaS products, fixing critical time-sensitive issues.
- Supporting the onboarding of a new placement student.

EventMAP Solutions **May 2024 – August 2025**
Placement Software Engineer

- Gained professional experience as a full-stack developer working across two enterprise SaaS products used by universities and educational institutions globally.
- **Collaborated directly with clients** to investigate issues and discuss specifications.
- Designed and implemented automated **E2E** and **API tests** using **Playwright**, identified slow running tests, **improving efficiency by 70%** and reducing pipeline execution times.
- Rigorously performed **QA testing** on upcoming releases using **Postman** and structured testing methodologies.

Arnold's Hotel Dunfanaghy **May 2021 – September 2023**
Waiter

- Gained excellent customer service skills in a formal restaurant environment.
- Leveraged strong communication skills to work efficiently with others in a fast-paced environment.

PROJECTS

Constraint-Based Academic Workload Scheduler | C#, Vue.js, .NET 9, PostgreSQL, XUnit **Sept 2025 – April 2026**

- Full-stack web application that generates optimised, personal study schedules based on assignment deadlines, availability and user preferences. Integrates with Canvas LMS to automatically sync user's academic data.
- Developed software architecture skills, database modelling and handling authentication using the .NET framework with EF Core.

Portfolio Website | HTML, JavaScript, CSS, CI/CD **Dec 2024 – Jan 2025**

- Personal portfolio website in a retro Windows 7 inspired design. Automated Continuous Deployment pipeline using GitHub Actions. Hosted by Cloudflare.

TECHNICAL SKILLS

Programming Languages: C#, Java, JavaScript, SQL, PHP, Typescript, HTML, CSS
Tools: Git, Docker, Postman, Azure, GCP, Kubernetes, Claude Code, Copilot
Frameworks: .NET, EF Core, PostgreSQL, Vue.js, Playwright, Laravel
